Carcinogenesis and Cancer Genetics

1. Unique expression of a fibronectin isoform in mycosis fungoides

2. Retrospective analysis of a subset of human repeat insult patch tests conducted by the Research Institute for Fragrance Materials over the years.

3. Suppression of p38α promotes fibroblast-led human squamous cell carcinoma (SCC) invasion through p38δ-dependent mechanism

4. Keratinocyte p38α ablation reveals a context-dependent regulation of tumor initiation, tumor type specification, maintenance, and malignancy.

5. Cancer immune control requires interferon-α dependent activation of the p16Ink4a senescence signaling pathways.

6. Family history of melanoma is a strong predictor for melanoma mortality rate in different ethnic groups.

7. Keratinocyte p38α ablation reveals a context-dependent regulation of tumor initiation, tumor type specification, maintenance, and malignancy.

8. CDC20 played an oncogenic role in human cSCC progression.

9. Heterogeneity of CNV in primary acral subtype melanoma

11. Ruxolitinib reverses accelerated tumor growth of RDEB-cSCCs in a xenograft mouse model

13. Uncharacterized protein REDI is required for epidermal differentiation and suppression of cancer invasion

14. CDC20 played an oncogenic role in human cSCC progression.

15. Association of particulate matter air pollution and itch: a digital epidemiology approach

16. Uncharacterized protein REDI is required for epidermal differentiation and suppression of cancer invasion

17. Precision RNA-sequencing of squamous cell carcinoma in situ identifies therapeutic targets

19. Revealing a common, yet novel cutaneous squamous cell carcinoma driver mutation hidden in the photodamaged skin genome

20. Expression and significance of RPK3 in the squamous cell carcinoma

21. An in vitro model of immunotherapy-tolerant melanoma persisters cell

22. CDC20 played an oncogenic role in human cSCC progression.
Prevalence of hidradenitis suppurativa stratified by age and sex
Gender disparity in dermatologic surgery leadership: A global perspective
Factors causing lack of diversity in dermatology residency programs: Medical students' perspectives
Characterizing amelanotic melanoma and factors associated with survival
Incidence of skin cancer metastases in US adults with atopic dermatitis
Risk of Serious infection in patients on systemic medications for the treatment of psoriasis: an observational cohort study
Oregon's War On MelanomaTM: A statewide public health experiment
Incidence, survival, and demographics of primary cutaneous gamma/ delta T-cell lymphoma in the United States from 2006-2015: A survey study
Diagnostic delay in hidradenitis suppurativa
Drug-induced pruritus in a tertiary care health system
Chronic lead toxicity: Skin signs and changes in cutaneous biophysical properties
Despite using sun-protective practices, melanoma patients do not report lower rates of sunburns
Use and cost of photodynamic therapy in the Medicare population, 2012 to 2016
The Oncotarget M receptor beta axis identified in prurigo nodularis
Drug-induced pruritus in a tertiary care health system
The malignancy-potential of pilar keratosis: a single-center retrospective study
Risk of rheumatic heart disease in patients with alopecia areata: A large, urban, retrospective Midwestern US patient population study
Sun protective behaviors and development of keratinocyte carcinomas in high-risk patients in the VAKCC (Veterans Affairs Keratinocyte Carcinoma Cohort Study)
Association between itch and cancer in 4,543 pediatric patients at a tertiary care center
Incidence, survival, and demographics of primary cutaneous gamma/delta T-cell lymphoma in the United States from 2006-2015: A survey study
Estimation of the relative contribution of environmental and genetic factors to facial skin aging: A step towards individualized cosmetics
Gender disparity in dermatologic society leadership: A global perspective
Association between patient medical complexity and time spent at dermatology office visits in the national ambulatory medical care survey
Gender equality among award winners and leaders at the Society for Investigative Dermatology meetings
Gender equality among award winners and leaders at the Society for Investigative Dermatology meetings
Gender equality among award winners and leaders at the Society for Investigative Dermatology meetings
Gender equality among award winners and leaders at the Society for Investigative Dermatology meetings
Gender equality among award winners and leaders at the Society for Investigative Dermatology meetings
Ten-year fatal risk for cardiovascular disease (CVD) in psoriasis
Drug-induced pruritus in a tertiary care health system
Sex differences in the perception of itch and quality of life in patients with chronic pruritus
Countylevel associations between climate factors and cutaneous melanoma incidence in the US
Diversity in dermatology: the UCSF experience
Real-world chemotherapy adherence for Kaposi's sarcoma in Sub-Saharan Africa
Hidradenitis Suppurativa dermatology visits by gender, race, and insurer in a midwest population
Infectious comorbidities associated with hidradenitis suppurativa: an analysis of the national ambulatory medical care survey and national health interview survey
Patient preferences when choosing a dermatologist
Real-world drug discontinuation of acitretin (ACI), ciclosporin (CsA), fumaric acid esters (FAE) and methotrexate (MTX) in patients with moderate-to-severe plaque psoriasis: a retrospective cohort study
